Hi Linda,

There's a high number of tree removals proposed, which I accept is primarily adjacent to the highway, and is unavoidable in order to implement the desired site access/highway proposals. I also acknowledge the majority of trees to be removed are low quality, Category C features when assessed individually.

A key component to the proposed removals is their mi•ga•on, with a replacement tree strategy key. Are you aware if this has been submi•ed? Prior discussions emphasized the importance that, not only does this scheme o•er biodiversity mi•ga•on for the removals, but provides signi•cant amenity mi•ga•on par•cularly on the site frontage. Su•cient space for the strategy to be implemented is key.

Kind regards,

Iain Osenton MArborA.
