

Ambassador programmes can be implemented which includes site visits, school interaction, career information about construction jobs. This supports STEM subjects, builds confidence and encourages more individuals into the construction industry.

Working with colleges and universities can help source candidates for our Future Skills programme. The Future Skills team engaged with a college local to the Beckton North Sidings project and held a successful assessment session to recruit 2 apprentices to work on-site. These same apprentices recently hosted pupils from their old college to launch a live project for them to work on.

How we support Education

- Ambassador Programmes
- Career Fairs
- Mock Interviews
- Work Experience
- Site visits
- Guest lectures at colleges and universities
- Promotion of apprenticeships

How we support Employment

- Work with Women in Construction
- Organise work groups to visit site
