

NOTES

- All trees, feature shrubs, climbers, shrubs and hedgerows to be planted in accordance with the implementation and maintenance guidelines. All landscape proposals must be referred to by the Structural Engineer during foundation design. No tree, feature shrub, climber, shrub and hedgerow species, size or location should be altered without prior approval from the Landscape Architect.
- Individual shrub/hedgerow/climber species to be planted in groups of 3-7.
- Individual species within ornamental shrub mixes to be planted in groups of 3-8.
- Lower growing species within ornamental shrub mixes to be planted at the front of the shrub bed as indicated.
- Planting heights to be specified in the schedule of materials.
- Native hedgerow shrubs to be supplied as bare root stock unless stated.
- Hedgerow shrubs to be planted within a 60cm wide bed and mulched.
- Any native hedgerow shrubs to be planted on a double staggered row, 200mm apart with no less than 1 per linear metre within a 50cm wide bed in accordance with implementation and maintenance guidelines. Any hedgerow stock to have a upright central stem furnished with evenly spread and balanced lateral growth the full length of the stem. If hedgerow hedgerow stock is proposed, shrubs are to be attached to a double line support line for hedgerow stock at 1m high and end for transparent stock at 60cm high fence using an approved clip and end out back to 12m in height at time of planting.
- Planting heights to be specified in the schedule of materials.
- Planting operations to be carried out in accordance with the implementation and maintenance guidelines.
- All planting to be in accordance with the implementation and maintenance guidelines.
- No species, variety, size or position to be amended without the Landscape Architect's prior approval.
- Where trees are planted, the Landscape Contractor shall ascertain the location of drains from the site manager, and shall if necessary make minor adjustments to tree positions to ensure that they are located at least 1.5m from drains. They should however be planted no closer to house/garage than is shown on the drawing, and if shown located in shrub beds, the shape of the latter should be modified if necessary to accommodate the tree position.
- All planting must be in accordance with the implementation and maintenance guidelines.
- If planting is required outside the October-March season, bare root shrubs will be replaced by 3L pot grown plants, and trees will be replaced by a containerised equivalent to be approved by the project landscape architect.
