Comments	<input type="text" value="I currently live on the main road through wardington in the listed cottages and we currently have high levels of heavy good vehicles travel on a road which is not suitable for the large Lorry's passing. currently we experience the foundations to homes currently being affected by the shaking of the houses from the car transporters, HS2 works vehicles and other hauliers using this road 24/7 with no restrictions. The road through the village and its listed buildings are not able to safely accommodate the levels of traffic and pollution that the potential increase to heavy traffic brings and there is a need to be a consideration to the health of residents in Wardington as the road has many blind bends on which there are access points and minimal safe points to cross the already very busy road . The only way that this planning application should be agreed or considered is if a by pass around the village is granted as part of this development/ planning application to protect the listed building. reducing the pollution and consider the safety of the residents of Wardington Village."/>
