Comments	<input type="text" value="Whilst I have already posted my strong objection to this application, I would also like to add two more points which I inadvertently omitted. One is objecting to the timing of this application, which I find to be extremely cynical as it was deliberately submitted immediately prior to the Christmas season, presumably so that most people would be otherwise occupied, and this would result in a reduction of objections. It was obviously deliberately timed to reduce the time allowed for objections. Another point is that, as this is basically the same application, made by the same applicant, I do not understand why all previous comments/objections are disregarded. Surely the previous objections are just as relevant this time. The applicants should not be allowed to keep repeating previously rejected applications. One assumes that they hope the surrounding communities will eventually give in. If so, they are wrong!"/>
