Type of Comment	<input type="text" value="Objection"/>
Type	<input type="text" value="neighbour"/>
Comments	<p>With recent large scale flooding in the Banbury and surrounding area and with knowledge that with the augmenting effects of global warming, the proposal to add a huge concrete site is insanity. The situation is already bad but rather than taking mitigating measures we carry on regardless. This is what is happening:</p> <p>Flooding because of global warming and the fact that the building of business and housing developments is concreting over our landscape. Answer = ignore these impacts. In fact, let's build more concrete causing less places for water to soak away and we'll contribute to climate change by further manufacture of concrete.</p> <p>Added pollution by industry and vehicle access. Answer: who cares. As long as there's a business opportunity to make loads of money, we'll not look beyond our pay checks to the terrible legacy we'll leave behind for our kids and grandkids. At least we'll die rich and not have to worry about the s%#t we've left for them to deal with.</p> <p>More reduction in habitat for our already struggling wildlife. Answer = It's terribly unfortunate wild animals and plants are losing their homes and food sources because we keep stealing it and because extreme weathers are making it more difficult for the poor lot to survive but on the positive, I have a nice house and car.</p> <p>This has to stop before nothing is left. We all have to take responsibility for what we do NOW. Do not approve this application and instead focus on our environment.</p>
