<b>Comments</b>	<input type="text" value="With regard to the amended LEMP for condition 13, the changes do not affect much of the approved LEMP however it is not clear whether they have rerun a BIA and whether it is intended to add any changes to the HMMP. The on site SUDS/attenuation basin is now quite constrained (limited buffer to the hard standing/road - EDP2425 _d017k) and it should be noted that this may affect the ability to reach the 'moderate' condition listed within the BIA. Beyond this I have no further comments.&lt;br/&gt;Charlotte"/>
