Comments	<p>The proposed development, as described and illustrated in the Planning Statement and other supporting documents, represents a significant investment and key stage in the realisation of the Innovation Quarter within the wider masterplan. The number, range and quality of employment opportunities is likely to be substantial - including a broadening of the type of jobs available to an expanding number of local residents. Further benefits are also likely to arise in and around Bicester as a result of such development - through clustering of other technological enterprises and the creation of sustainable supply chains and opportunities for enhanced skills & training facilities.</p> <p>The proposal would, therefore, contribute to the Council's Business Plan - "An enterprising economy with strong and vibrant local centres". This includes "Supporting business retention and growth, and working with partners to support skills development and innovation".</p>
