Comments	<input type="text" value="I believe that this application is not only good for Oxford United but for the local and surrounding community. The new stadium is not just a venue for football every two weeks in the winter but a year round facility that can be utilized and enjoyed by many thousands of people, with many of them not even football fans. It takes fully into account the issue of fans getting to the ground, encouraging them to use public transport, with the stadium having excellent rail and bus links. There will also be more than adequate parking provision for car and cycle users. With all the access and highway works, landscaping and all associated and ancillary works and structures a previously undistinguished piece of scrubland will be transformed into a venue that the people of Cherwell and surrounding districts can be proud of and will serve the community for years to come."/>
