Comments	<input type="text" value="I support the application for the following reasons:
- It will enable the only professional sports team playing in the county to continue and thrive.
- the clubs excellent work in the community will be enhanced and grown (with the availability of their own space)
- the location is the best possible in the counry (enabling the club to still be called Oxford United). Being so close to a mainline train station, with the park and rise parking, and the excellent transport links gives a huge opportunity to reduce the use of cars (unlike the current site of the football ground)
- the stadium build itself is very exciting. Carbon neutral, generating electricity and world class. Something that the Oxford area can be proud of (and isn't university linked)
- the local Stratfield Brake facilities are outdated and the local sports clubs have been badly let down. The football club will improve the facilities and in times of financial strain, will enable finds to be used elsewhere.
- Thete will be significant investment in the local area helping to generate economic benefits (and local jobs)

Please approve this once in a lifetime opportunity."/>
