<b>Comments</b>	<input type="text" value="My 2 main objections are 1) the affects on the local natural environment, and 2) the infrastructure burden. 1) with the development at Oxford North, nature is being squeezed out of the local area, and constructing a large site with fences, steelwork and concrete will further displace local animals. I'm sure care will be made to limit disruption to the lived environment, but the stadium is not an urgent necessity so it is a bad idea to displace yet more ecosystems needlessly. 2) there is already too much motor traffic moving through this area and increasing traffic capacity will disrupt heavily during construction, and, once completed there will be increased air &amp; noise pollution that will have long term negative effects on an already noisy &amp; stinky area."/>
