Comments	<input type="text" value="A new community stadium complex in Oxfordshire will create jobs and boost the local economy. The ESG conscious proposals are world leading by design and will promote business, leisure, health and wellness benefits for the community. The vision of the project is strongly aligned with the interests of future planning and infrastructure needs whilst being sensitive to, and supporting, local residents. The new facilities will reinforce and attract future investment in an innovative Oxfordshire. The scheme also promotes greener well connected travel by encouraging less private car use and involving public transportation. This is consistent with regional and national stadiums. I strongly support the application."/>
