Comments	<input type="text" value="I believe the new stadium is a badly needed facility in Oxfordshire will will benefit the community, both locally and across the county as it will enable community activities as well as providing facilities for education and health while also contributing money and expertise to improve the sports fields on Stratfield Brake.

The new stadium would also be more environmentally sustainable, especially with the planned increase in use of public transport hub, which is not viable at the Kassam Stadium.

Oxfordshire is crying out for the this kind of world class facility, in keeping with the image and reputation of the City of Oxford.

Above all, it will provide a stable home for the county's only professional sports club, which appeals to many local residents and not just those of us who regularly attend football matches, as evidenced by the 30,000+ who followed Oxford to Wembley in recent years, not just once but on three separate occasions.

Please give the proposal your full backing and grant the necessary planning consent
Many thanks"/>
