Comments	<input type="text" value="As an Oxford United supporter I welcome the planning application for a new stadium. No site is going to be a perfect choice, but the Triangle offers the best available solution for train and bus access. The facilities proposed balance the needs of the club with the concerns of local residents. There is clearly a concern about matchday parking, but that can be addressed with residents parking permits and/or matchday restrictions. There is also a concern about flow of pedestrians to the park and ride. The proposed bridge should address this. All in all, it looks a well balanced scheme that meets the needs of the football club without adversely affecting local residents too significantly."/>
