Comments	<input type="text" value="I travel from Surrey to matches at the Kassam by car, but would easily be able to travel to the new stadium by train, reducing my personal carbon footprint along with countless others who currently have only one option to travel to matches.

This is an amazing opportunity to provide a world class facility, which, in addition to making the football club sustainable economically and environmentally, would leave a legacy for the local community for generations to come.

There would be huge benefits to the local area with the project providing a major local economic boost as well as giving much needed support to the nearby sporting clubs."/>
