Comments	<input type="text" value="The design is stunning and good consideration has been put into creating a brilliant space out of what is currently a wasteland. It is a sensitive plan that acknowledges concerns of locals and caters to the environment.

The train link ensures that parking and traffic will not be a problem, as the vast majority will use public transportation. The sustainability commitments will make this a world leading facility for Kidlington.

This will be a sporting venue Oxfordshire can be proud of and will be a massive asset to Kidlington. The facilities at the stadium will boost local community groups and provide something aspirational for the next generation. This is a once in a lifetime opportunity to provide something life changing for local residents.

I wholly support the application and hope that the planning committee appreciates the design's attempt to cater to objections raised by locals and other North Oxford pressure groups (whose lack of willingness to acknowledge anything positive about the development is shaming)."/>
