Comments	<input type="text" value="As a resident of Kidlington, I fully support the proposal to build a stadium on the triangle site. It would help to bring a much needed regeneration to a tired area and provide world class facilities which the community can be proud of. It will ensure the future of Oxford United which is so important to so many, but it goes far beyond football, providing modern facilities and benefits to the local community which can only be a good thing for the village as it is certainly lacking in that respect. The club have done a huge amount to reduce the effect on environmental factors, and the location benefits from current transport links. The project will not please everyone but the benefits hugely outweigh any potential problems.

It is a once in a lifetime opportunity for both Kidlington and the surrounding areas and I hope that this project goes ahead and is of benefit to so many."/>
