Comments	<input type="text" value="Building a very large structure in a green belt location, when a viable stadium already exists. The impact of car parking in local streets and the congestion this will cause. The threat of road closures on match days and the disruption this will cause for local traffic, including emergency vehicles. Also inability for people to access station car park and park and ride if road is closed. Loss of green belt and the impact on flora and fauna."/>
