Comments	<input type="text" value="I fully support the proposal for the new stadium made by Oxford United FC. A new stadium in this location would be fantastic. This new location offers significantly better transport links in comparison to the current stadium, with better bus and rail links. The new development will create many new jobs and safe guard that large parcel of land for community use. The new stadium would enable the football club to be more sustainable and raise higher up the football pyramid, this would gain them more media coverage and also increase the profile of the area.

This new stadium is a no brainer, it will give the football club a new home and give the city a brown field site that can be used for much needed housing.

So long as the application falls within the parameters for the law and supports the needs of the local and wider Oxfordshire communities, this application should be given the green light."/>
