Comments	<input type="text" value="For Oxford United to be successful and sustainable they desperately need a stadium that is owned by the club and one that can allow them to fulfill their environmental and social targets.

The new stadium at the 'triangle' has the perfect transport links and will provide much needed work to local residents as well as becoming a destination on non match days by providing exhibition space s and retail outlets.

Oxford United are the only professional football league club in the county and that status is under threat if they are not to be granted permission to build a new stadium as the situation at their current stadium is untenable. Besides which the current stadium is poorly sited, aging and does not meet modern environmental targets."/>
