Comments	<input type="text" value="The new stadium proposal would provide a new home for the main Oxforshire sporting team in the county.
This proposal provides environmental benefits and being on the main A34 ring road with rail links makes this a great location for accessing during match days.
This would be a far more suitable location than the current ground with congestion and parking issues at the stadium and Littlemore areas.
The clubs sustainable approach and engaging with the community is a real benefit to the region and provides something to look forward too at weekends. It has really helped with my mental health and I am sure it helps many more."/>
