Comments	<input type="text" value="I am objecting to the new stadium because I am concerned about the destruction of the Green Belt. We appear to be losing so much of this in Oxfordshire and I feel that Oxford United have failed to demonstrated the very special circumstances needed to build on the Green Belt. I am also concerned about the impact this will have on nature conservation and the impact on trees. The breeding presence of rare Brown Hairstreak Butterflies have been confirmed and so this will be lost. Also, many other forms of wildlife feed in this area and many mature trees will be felled if the stadium is built. It is also against government policy to build on the Green Belt.
There is also high risk of flooding due to surface runoff, interruption to natural drainage and changes in the water table. Noise and light pollution will have detrimental effects on both humans and wildlife.
There will be an increase in traffic congestion and I feel that it will be a huge inconvenience to local people to close the roads when Oxford United are playing at home or if there are any other events taking place at
The majority of local residents voted against the new stadium being built and I feel that they should be listened to."/>
