Comments	<input type="text" value="Football needs to be sustainable for all of it's stakeholders. Each business has a commitment to reducing it's carbon footprint and by allowing this application, it will reduce the number of vehicles that currently visit the Kassam Stadium on matchdays. With the rail links in place, it will also encourage home and visiting supporters to use the rail network and thus reduces the number of vehicles arriving to the triangle.
The new amenities that will accompany the new stadium, will provide jobs to the local area and increase the income in the local area with positive knock on effects to the local community.
Having been a season ticket holder at the manor and at the Kassam, it is vital that Oxfordshire has a high level football team to be proud of. This new stadium will give the county and the club a permanent home that will only strengthen the links between the club and it's community."/>
