Comments	<input type="text" value="I feel a new stadium for oxford united will be a positive move for not only the football club but the wider community. It will great for the local economy if the team were to get to the premier league and i feel the stadium would be the first step in this direction . Just look how Brentford football club, probably a smaller club than ourselves , have flourished since they moved stadiums. The stadium will create jobs , more and more as the club grows along with the fan base . The community are close to having a stadium to be proud off which can never really have been said about the Kassam stadium. At long last we have a group of owners willing to do things properly and I'm confident this will be embraced by the fan base and the local community who I'm sure will come on board knowing the wider benefits of a stadium for other sports clubs, better corporate hospitality opportunities etc. you only have to look at other new stadiums to realise the wider impact and job creation etc. I am 100% behind the proposal and feel it would be great for the whole of Oxfordshire to have a first class stadium within its boundary.
