Comments	<input type="text" value="I object to the stadium because the space is too restricted for the type of structure. The roads in the area are already seriously overcrowded during the week and with such a large complex, drawing thousands of vehicles on match days, it will make the weekends hell for local residents. I use public transport to go to work so I am aware of the number of people preferring to drive despite the fact that the bus service is available. Therefore, the argument that fans will use the train service to attend the match is not persuasive. Public transport is uncomfortable, expensive and not door to door so few will opt for this. There are already plans to massively increase the populations of Kidlington, Begbroke and Yarnton without any plan for new roads or a seriously thought out public transport system so putting a stadium in the middle of this seems like yet another shortsighted act. This is before mentioning the loss of a much needed green lung beside the A34."/>
