| Comments | <input type="text" value="The move to Kidlington from the current ground will increase the use of public transport and cycling for supporters to get to the ground therefore reducing the overall carbon footprint of local football. Currently, the vast majority of supporters drive to the stadium. Also, without a move, there is the possibility of the loss of professional sport in the Oxfordshire area, which will impact local business through the loss of a number of visitors to the area."/> |
