Comments	<input type="text" value="Air Pollution in North Oxford is high at present without having huge influxes of cars converging upon Kidlington to football matches, along with queues of traffic due to road closures and diversions.
Why choose the Green Belt to build a huge eyesore like a stadium which will not enhance the beauty of the surrounding area and will only destroy the habitat of local wild life.
The increase in traffic noise and noise of fans from the stadium on match days will undoubtedly disturb many of the local residents living close to the stadium. Surely a huge stadium so close to a residential area will raise many complaints in the future."/>
