Comments	<input type="text" value="I believe that the transport issues on match days should be a reason to not allow this application. Oxford Parkway Station doesn't have the capacity to cope with thousands of people using it to come to and from a match day. As well as this particular issue, an increase in frequency of trains per hour will also affect people living down the line, as this will result in the level crossing by Bicester Village Station being down for more time per hour than it normally is. I also object to the use of green belt land for this stadium when so many housing developments is also planned in thr surrounding areas, with the council that this land would remain undeveloped to allow planning for these houses."/>
