<b>Comments</b>	<input type="text" value="Traffic around Oxford is already very high and in particular at Kidlington and North Oxford. I am a cyclist and the air pollution with any additional cars will add further to the ill health of all road users, pedestrians and residents nearby. The pollution is high at the moment without having huge influxes of cars converging upon Kidlington for football matches, along with queues of traffic going to the other attractions at the site. The choice of the Green Belt for the stadium goes against current thinking on the environment and will destroy the local wild life there. The increase in traffic noise and noise of fans from the stadium on match days will disturb the local residents living close to the stadium and make it much more difficult for local residents to shop at Sainsbury's Kidlington and Kidlington shopping Centre."/>
