Comments	<input type="text" value="I would like to express my strong support for this application.

I am an Oxford United supporter, but to me this is about far more than building a stadium for a football team to play in. It's a stadium site which could be used by the wider community, a catalyst for regeneration, an enabler of more sustainable transport than currently used, new and better green spaces than what was there before and be a high profile statement for sustainable development. This is about an asset for Oxfordshire, not just Oxford United.

The club through the extensive published work undertaken have shown that they are more than willing to build a stadium and asset for Oxfordshire that helps deliver with the wider County council's strategic objectives.

The reasons why the club needs it in the short term are clear, not having a home is unthinkable. In the long term, with the club seeking to grow sustainably, not rush for some promised land for short term glory, this new stadium can be that catalyst that provides a key step in this journey - the success of Oxford United can only be success for Oxfordshire.

Oxford is a place I advocate for whenever I can and return to when time allows, I still consider myself in a way a resident of Oxford and care deeply about its future and prosperity - this stadium proposal is part of that and can be delivered in a way that will benefit everyone."/>
