Comments	<input type="text" value="Kidlington already over burdened with Oxford over spill, the result of stadium traffic on existing road system would be detrimental and the closure of the Banbury Road on match days would result in emergency vehicles being delayed with possible fatal consequences. The area of Kidlington adjacent to proposed stadium would result in parking chaos as fans seek parking spaces, one only has to look at the present stadium site to see the parking nightmare based on crowds of less than 9,000, with a proposed capacity of 16.000 there would be more attendees than residents in Kidlington, these people are not going to ride bikes nor would existing public transport be able to cope. This is not a suitable site for such a large development."/>
