Comments	<input type="text" value="The proposed positioning of the stadium will allow me and my nephew to cycle to the games providing exercise and reducing Road traffic, this will be the case for all fans in the area and with the transport links from Oxford to the train and bus station nearby it would significantly reduce those driving on match days. The plans look like they take into account the concerns raised over the environmental impact and be a much more eco friendly stadium than the Kassam which is not suitable any more.

Having a stadium like this designed for multi purposes will also encourage events for those from Oxford and the surrounding areas, a benefit for all."/>
