Comments	<input type="text" value="Squeezing in large venue into a small space, there is not an option for it to grow in time and after a decade or so, they will need to find somewhere else. The traffic issues, will not only disrupt the local area, but will have huge traffic implications further a field in Oxford City. Oxford United should focus on improving the current site, where it is well known, has transport and space to grow. It also helps the local community there, who will be very sad to loose the stadium. That side of Oxford really needs the stadium to help the local economy and regeneration. Please do not be swayed by numbers of fans supporting the venue change, they are just being loyal to the club and most of them don't have to live with the consequences. Please think about the local people who know the area and the daily impact the stadium will have on the local area. (e.g. regular road closures will cause traffic chaos / a commercial development of this size and scale is contrary to the Local Plan and planning policy for Green Belt sites / it will destroy valuable biodiverse wildlife habitat. Please DO listen to the local people. Thank you."/>
