Comments	<input type="text" value="I think it's important to maintain a professional football club in Oxfordshire. It would disappoint thousands of fans if the club didn't exist. In addition the population of Oxfordshire is rising significantly with the potential for an increase of the fan base.

The football club are taking the environmental friendliness seriously by meeting the councils stipulations. For example the proposed football stadium is very close to the railway station and the Park and Ride which can be used by both home and away fans.
The other facilities within the planned complex can be used by the wider community. It will have a positive effect on Oxfordshire's economy, i.e. job creation, businesses investing in the area.
It will be good for the club to own it's own facilities rather than rely on renting from a third party.
It will be good that both women and men will play at the stadium which may encourage more female participation within the club.
The club plans be an active and positive part of the local / wider community which will have a positive effect on mental health and wellbeing.
I await with eager anticipation of a positive result."/>
