<b>Comments</b>	<input type="text" value="As I lifelong supporter of Oxford Utd, and been in a family of several generations of Oxford Utd supporters I support the building of a new stadium. Not only is this a once in a generation chance to build a eco friendly stadium that the whole county can be proud about but a chance to help bring more revenue to the area. As a non driver being near a train station it would help me go to more games as it takes a fair bit of planning to get to the Kassam. I think the objections of building it in the triangle are minimal at best as people would adapt quite quickly and it would be seen as positive in the long run. A new state of the art stadium will also benefit the club as it would make them more sustainable and the future of the club would be better secured."/>
