Comments	<input type="text" value="The future of profession sports in the county is dependent on this.

The new proposal is by the far the most ideal location for locals and traveling fans. Connection to the major road network is great but also it's on the doorstep of a train station and major bus routes. While in Bicester I know that the new location would be a walk and train ride to the games.

In addition the proposal for green and environmental impacts is positive step and can be a for front of modern stadiums at this level of the game.
The community access to facilities are also a huge outlook of increased revenue for local businesses and job opportunities."/>
