Comments	<input type="text" value="I support the planned stadium at 'the triangle' because it is ideally located for existing bus and rail services. When built, the stadium will be one of the easiest football grounds to travel to by public transport in the entire country. Oxford United will have the first all electric stadium in the UK and the landscaping and green roofs and walls will be a vast improvement in terms of biodiversity than that which is provided by the willow coppicing monoculture business that presently occupies the land. Kidlington's grass roots sports clubs will provided with properly drained pitches and decent changing facilities that the local council has failed to provide at Stratfield Brake. Furthermore, the hotel, gym, sports bar and health and wellbeing centre will provide much needed jobs and leisure opportunities for the local population. The planned development is of great importance as the UK strives towards net zero. It will provide a benchmark whereby all future sports stadia will be judged. It is a world class stadium for a world class city. Don't let this opportunity pass us by. Approve the planning permission and let's all look forward to an exciting future for the club, for Kidlington, for Oxford and for Oxfordshire."/>
