Comments	<input type="text" value="I have been a supporter of Oxford United since the late 1960's and have followed them through my working life and into retirement. Its been a stable piece of my leisure time and has enabled me to regularly meet family and friends at matches. I have lived in Headington for 60 years and this has enabled me to attend games regularly both at the Manor Ground and the Kassam Stadium. I used to walk to the Manor Ground and I currently get the OX7 bus service to games and I would plan to use public transport to the new location. The environment is a an ongoing concern for me and the proposal would comprise many features to enhance the development and make it blend into the surroundings. The economic reports state that the proposed location is not of significant biocultural significance and they plan to improve this as a condition to the application. This is important to many thousands of people of all genders in the area and would be a critical component of future generations opportunities moving forward."/>
