Address	<input type="text" value="2 Smith Street,Chapelton,Sheffield,South Yorkshire,S35 1WY"/>
Type of Comment	<input type="text" value="Support"/>
Type	<input type="text" value="neighbour"/>
Comments	<input type="text" value="I am in support of this application as a regularly visiting Oxford United fan. It is currently not very easy for me to travel to matches as I would prefer to take public transport to watch the games but at the moment this can be rather tricky. The great transport links in this proposal would be a fantastic benefit to me and I know other fans who travel some distance to watch games regularly in Oxford. It will mean I won't need to drive the journey each week as this proposal will turn the stadium from one of the furthest in the league from a station to one of the nearest. A 95 minute walk at present to a 5 minute walk at the Triangle.

This move is also a much better option for the environment as the number of cars being used due to the bad transport links currently needs to be addressed. An all electric eco-friendly built and run stadium will make such a huge difference.

There is such a lot of benefits being offered to the surrounding area that will improve things for the residents and will help the country as a whole by the improved bio diversity as 250 more trees will be planted and access is granted to a previously inaccessible scrubland. As a designer and sustainability advocate myself, I m excited by the prospect of a fully electric stadium and the design being sympathetic and I keeping with the surrounding areas."/>
