<b>Comments</b>	<input type="text" value="The Proposal is a total tragic waste of an existing rare environmental resource, in exchange for an oversized sports stadium, especially when there are existing sports facilities at the spacious Kassam Stadium, which has more than enough capacity for the Oxford United team and its loyal supporters. It is an appalling idea that yet another piece of the Oxford green belt is going to be tragically destroyed by stamping a vast concrete and metal structure onto this much needed green haven. If this patch of green environment is destroyed for a stadium, there are huge problems for the local residents. There are no car parking facilities for the travelling football supporters, the local area will be flooded with visitor's cars. There is mention of sealing off the Banbury Road on Match days, with the local residents in the area praying that an emergency fire engine or ambulance are not required on these days. It is extraordinary that the only remaining small piece of Green Belt land known as the Kidlington Gap, which separates Kidlington from Oxford has been suggested as a possible site on which to stamp a vast stadium. It is an Environmental Disaster that can be prevented, by Oxford United unselfishly choosing to stay at their existing Kassam Stadium."/>
