Comments	<input type="text" value="Dear team,

I think the ation of a new stadium for Oxford United is an ecological crime. The amount of carbon dioxide that will emitted in constructing such a stadium is enormous. We have a responsibility to the coming generation not to proceed with this unnecessary project. I say it is unnecessary, because there is already a perfectly good stadium in Oxford. I do not know all of the details about Mr Kassam, but I can only imagine he does not wish to lose revenue from the rental of the stadium.

In addition to the ecological damage such an enormous project would involve, there are more local concerns. Traffic will be increased in the local area, there will be much disruption, and of course it is a totally inappropriate development of a green belt land."/>
