Comments	<input type="text" value="The proposed stadium will lead to an intolerable level of traffic congestion. Current (temporary) roadworks already show how bad traffic can be at peak hours. This stadium will make access in and out of Kidlington very difficult even on weekends. This area simply does not have the physical infrastructure to support the regular coming and going of large numbers of people.

There will also be great disturbance to the peace and quiet of the closest neighbourhoods, eg Garden City. This sort of noise pollution should not be so close to a large residential area.

This stadium will also have a detrimental impact on the nature conservation currently afforded by the Stratfield Brake area. It is vital for the physical and mental health of residents that a substantial green space remains accessible to all."/>
