Comments	<input type="text" value="There are very adequate reasons set out in the FoSB leaflet to justify my objection to the proposed development. It is clear to those who live in this part of Oxford that the project to build a football stadium even without any additional buildings would cause intolerable suffering to those who are already living in the area around and/or adjacent to the Kidlington Roundabout. There are other major developments in this section of Oxford, which without more are already causing considerable traffic congestion and interference with the everyday activities of those who have built up the community with regard to the protection of the environment. This stadium plan will bring about an environmental disaster."/>
