Comments	<input type="text" value="I fully support the proposal to build a new oxford united stadium at the triangle. The present location. Deems it necessary for the ground to be vacated in 2026 so a new ground is necessary. As the triangle is already owned by Oxfordshire County council it is already land that has the necessary ownership. The location is ideal for local infrastructure links and as it has a train station next door so this will be a great way for fans to reach the stadium and will reduce the traffic on the A34 and surrounding Kassam roads which are presently the only way to reach the existing stadium. The new oxford united stadium will incorporate many energy and environmental friendly features along with the proposed usage of it for many other business and sporting facilities thus promoting a stadium that will be an advantage to the local area and community. This stadium will be a much needed asset to not only the oxford football community or sports but to many other ventures that may not necessarily be supported at present. Please consider this location it will mean a lot to so many people."/>
