Comments	<input type="text" value="I am pleased to see that some provision for integrated swift nest bricks is proposed. However this is a large building and offers ample space for this type of biodiversity enhancement. The bricks themselves are inexpensive and unobtrusive and once used, the presence of swifts would add to the well-being of residents. I would like to propose that a minimum of 12 integrated nest bricks should be a condition of approval of the application. This would be closer to the figure recommended in the Council's Guidelines for the Built Environment. Chris Mason Cherwell Swifts Conservation Project"/>
