Comments	<input type="text" value="I am mostly concerned about traffic in the neighbouring roads.

This includes construction traffic such as trucks and cranes and workers during the initial phases of construction, as well as commuter traffic etc once the project is completed. The Moors is a narrow road with speed bumps and many parked cars, so it is unsuitable for any increased level of traffic.

It is more likely that the bulk of traffic will choose to go along Benmead Road before reaching the main Banbury Road A4260 . This is also a relatively narrow road, currently without speed bumps. However Benmead has the entrance to North Oxford School; a large number of families with young children from North Kidlington cross the road at school opening and closing. Any significant increase in traffic will impact the safety of these families."/>
