Objection to the above proposal

As a resident of Kidlington I object most strongly to this proposal for houses to be built on this classic green belt agricultural land. It is a haven for many people and wildlife with some endangered birds that breed there and wild flowers. Many of us enjoy daily walks there in rain or shine, winter and summer.

There is already a pavilion at Stratfield Brake with adequate car parking and nature has created her own landscaping with the hedges, woodland and river Cherwell providing nesting sites for many bird species, foxes, deer, badgers and water birds. It is a tranquil area for many to recharge their well being.

With this number of new houses it will be even more difficult to get appointments at the hospital, doctor, dentist and a school place. There is also a paucity of car parking in the village. So much more infrastructure would be needed and the disruption to residential roads would be great and they will become "rat runs"

We would lose so much.
