Subject: Longford Park- Nesting bird survey

Follow Up Flag: Follow up
Flag Status: Completed

Hi Ben,

Following your correspondence with my colleague Dan Simpson yesterday regarding Longford Park, Banbury, I can now confirm that I have attended the site this morning.

After conducting a nesting bird survey in the area due for tree removal (identified on the proposals plan as the Vulcan cabinet base), I can confirm that no evidence of nesting birds was recorded. As such, you should be able to proceed with the clearance works this afternoon. Should these works not be undertaken this afternoon, it should be noted that this morning's survey is only valid for three days and therefore if works do not proceed within this timeframe, an update survey will be required.

Please note we are in the middle of the active nesting season and nests can be created at any time. Should any bird nests be discovered during the works, all works should cease immediately, at which point I would be pleased to provide further advice.

I trust this good news is welcome and that you will be able to undertake works this afternoon.

Kind regards,

Hannah
