<<Secondary capacities and NOR 2010.xls>>

Alice,

Please find attached a copy of the capacities and NOR at January 2010 for each of the secondary schools you mentioned. In relation to the BSF documents you can use the figures for projected population as a guide but be aware that these only include planning sites which have full approvals and that most strategic sites will not have been taken into account.

We update our place planning forecasts each year and the current set are in production. This information will be formally published in the Autumn and will have commentaries which explain the impact of major sites such as Upper Heyford on neighbouring schools/the need for new schools. As I explained the children of secondary age generated from this development (Heyford Park) would currently be in the catchment area for Bicester Community College. An additional secondary facility is to be built at SW Bicester for which contributions have been sought and secured from various developments as this is to provide joint facilities to the two existing secondary schools in the town.

Hope you find this helpful.

Allyson.

Subject: RE: Upper Heyford enquiry re secondary capacities.
Importance: Low

Alice,
pupils from the houses let on short term arrangements at the site now have a catchment primary school of Tackley CE Primary School although not all pupils' parents choose this as their first preference so not all of the children attend this school. A previous developer provided a double temporary classroom unit as temporary additional capacity at the school for the time until the new development is started and a new school provided. The cost of travel is also met by the developer. The unit will be removed as soon as the new school is provided to return the school to a sensible size and to restore much needed play space. There are no intentions for this school to grow on a permanent basis. Tackley CE Primary School is currently a feeder school for the Marlborough School at Woodstock and thus many of its pupils attend that school. In the event of the school being oversubscribed those pupils living nearer the school will have precedence. This school is now regularly oversubscribed and there are new housing developments either under construction or planned for the near future in the town of Woodstock. This is likely to mean that pupils from Upper Heyford may not find it straightforward to gain a place in future. The new primary school will be a feeder school for secondary education in Bicester. The site will then be in the designated catchment area for Bicester.

The current capacity of Gosford Hill School is 1237, the NOR at January 2010 was 1067.

Allyson,

Many thanks for the information provided below on the capacity of secondary schools in Oxfordshire. I understand from your email that the Site is now in the catchment area of Bicester Community College. I would however, be

grateful if you could confirm whether or not the Site also remains in the catchment area for Marlborough School. I would also be grateful if you could provide the capacity and numbers on roll data for Gosford Hill School.

Many thanks

Alice
