

TECHNOLOGY AT YOUR FINGERTIPS

Our design approach brings modernity to everyday living, creating a contemporary and desirable home. But it's our commitment to only using the most progressive technology that really makes your home special.

As well as 100Mb super-fast broadband pre-installed as standard, all homes are fitted with the home information system – The Shimmy – offering access to a wealth of information from booking a car from the car club, checking the real-time bus departures from your nearest stop and receiving local updates, to checking real time energy use and costs.
